## COVID-19

### Information about COVID-19 (SARS-CoV-2 PCR Assay)

PLEASE NOTE: Testing was performed using the Thermo Fisher TaqMan 2019-nCoV Assay Kit v1, TaqMan 2019-nCoV Control Kit v1 Test, TaqPath COVID-19 Combo Kit and/ or Panther Fusion® SARS-CoV-2 Assay Kit by real-time (RT) PCR. Positive results do not rule out co-infection with organisms not included in the Thermo Fisher TaqMan 2019-nCoV Assay Kit v1 and TaqMan 2019-nCoV Control Kit v1, TaqPath COVID-19 Combo Kit and/ or Panther Fusion® SARS-CoV-2 Assay Kit by real-time (RT) PCR. The agent detected may not be the definite cause of this disease. This assay is for in vitro diagnostic use under the FDA Emergency Use Authorization (EUA). This test is only authorized for the duration of time of the declaration and for the detection of SARSCoV-2 RNA virus and/ or diagnosis of COVID-19 infection under section 564 (b)(1) of the act, 21 U.S.C.360bbb-3(b)(1) unless the authorization is terminated or revoked sooner.

A Positive result indicates the presence of SARS-CoV-2 RNA but does not exclude bacterial infection and/ or coinfection with other viruses. The agent detected may not be the definitive cause of disease. This result should be combined with clinical observation, patient history, and epidemiological information for patient management decisions.

Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for treatment and other patient management decisions. Negative results must be used in conjunction with clinical observation, patient history, and epidemiological information for patient management decisions.
